Forecast for Tuesday 23 Feb 2021

Weather: Clear spells with patchy mist or fog in valleys in early hours, but clearing overnight as high cloud continues to spread over and winds strengthen. Then a bright, but mainly cloudy and windy start Tuesday, but cloud amounts will continue to increase and thicker cloud in late afternoon and evening may bring the odd spot of rain or drizzle

Chance of cloud free mountain/hill tops above 600m: 90% overnight, decreasing to 60% through the morning and 30% from around dusk

Visibility: Poor or very poor in mist and fog in early hours, otherwise good, but occasionally broken cloud down to 600m by the afternoon and lowing to 500m, perhaps 400m at times from dusk to bring poor visibility at height and moderate at times in rain or drizzle beneath the cloud

Freezing Level*	1500m	2600m	2500m	2400m	1900m	2600m	2500m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Very windy at height with some chill effect, but generally mild. Some very strong gusty winds on lower leeward slopes as well. Strength of wind will bring risk of being blown over.

Recent rainfall: measured at Cat & Fiddle: altitude 511m
